

D&D Character Database

By: Patrick Doran, Jaeha Hwang

System Description

- Simulate DND character sheet with emphasis on spells
- Users create characters and manage spells and weapons
- Users can look at weapons and details of their character
- Managers can create new spells for users to lookup

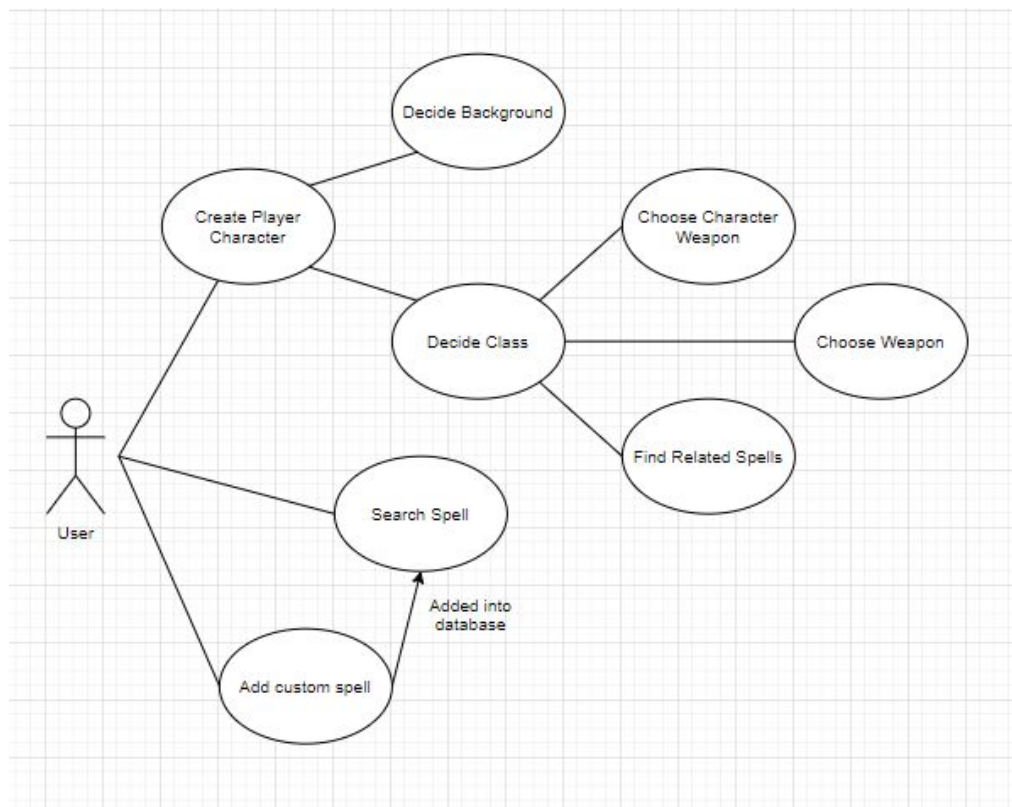

Implementation Details

- SQLite for databases
- Create a web application
 - Combination of html5, CSS, bootstrap, and javascript for front end
- Django for back-end
 - SQL functions
 - Handle endpoints
